III. **Description**

In order to secure additional maintenance funding for city streets, the Department of Public Works must submit a resolution to VDOT requesting that certain city streets be added and removed from the street inventory list under the state's Urban Maintenance Program. This resolution will formally request that VDOT accept the Department of Public Works' recommended changes to VDOT's current street inventory.

IV. **Analysis**

Section 33.1-41.1 of the *Code of Virginia* authorizes the Commonwealth Transportation Board (CTB) to make payments to cities and towns within the urban system for maintenance, construction and reconstruction of roads and streets, which meet specific criteria and certain conditions. The City of Norfolk is able to request maintenance payments for city streets through CTB's Urban Maintenance Program. The Department of Public Works has identified 9 street segments to be added to the VDOT reimbursable inventory and five street segments have been identified to be deleted from the VDOT reimbursable inventory. The requested street segments to be added cover 1.55 total lane miles, whereas the requested street deletions cover 1.06 total lane miles.
